

Ultimate List of Websites that Pay Writers in 2015

It has been a while since I last published my list of websites that pay writers.

A lot has happened since publishing the last two lists; some of the sites are no longer active, some of the sites stopped accepting contributions from freelance writers, and there isn't as much flexibility in the categories of the previous lists since most of the sites featured were either design or tech sites.

That has changed, though.

This new list is more comprehensive, includes more sites and is updated for 2015. In fact, I'm finalizing this list on the 12th of January, 2015.

So what's included?

- **110 websites that pay writers, verified for 2015.**
- **The sites included accept contributions in over 55 categories.** Yes, you can submit articles in at least 55 categories, so there's no excuse as this list is pretty much all-inclusive.
- **Most of the sites pay \$50 or more per article;** more than half of the sites are confirmed to pay \$50 per article. At last count, 64 of the 110 sites are verified to pay at least \$50 per article; in total, more than 64 sites pay above \$50, but we could only verify 64 sites on the list in what way or the other. Some of the sites even pay up to \$1,000 per article.
- **Most sites featured pay via Paypal or Check**
- **These sites pay cash for articles.** No revenue sharing site or anything of that sort included.
- **Some of the sites on this list pay upon acceptance of your article,** while others require you to wait a few days or weeks to be paid.

Sites that Pay \$50 or More

The sites in this category pay at least \$50 per article; you can earn significantly more than \$50 with most of them, and some even pay as much as \$1,000 depending on the nature of your contribution.
